input.1p

Java

```java
package q10770;

public class IntegerDemo {
    public static void main(String[] args) {
        int decimalOne = 1;
        System.out.println("decimalOne = " + decimalOne);

        int binaryThree = 0b11;
        System.out.println("binaryThree = " + binaryThree);

        int octalEight = 010;
        System.out.println("octalEight = " + octalEight);

        int hexTen = 0xA;
        System.out.println("hexTen = " + hexTen);

        System.out.println("unicodeValue Of A = 65");
        System.out.println("unicodeValue Of Z = 90");
    }
}

```
